

Web Developer

Creative and passionate professional embarking on a career transition into front-end web development. I am excited to join a fast-paced, knowledge-rich environment where I can positively contribute to the productivity and team culture, while continuing to feed my curiosity for software development to propel my growth within the organization.

PROJECTS

E-Commerce Retail Website

[Preview](#) [Github](#)

Tech: ReactJS, Next.js, Node.js, Cloudinary, Auth0, Strapi, GraphQL, Stripe

An e-commerce retail site built with React features a headless CMS (Strapi), fully functional user login with integrated Google authentication, shopping cart checkout, order history, and purchase confirmation.

Travel Inspiration Dashboard

[Preview](#) [Github](#)

Tech: ReactJS, Fetch, LocalStorage, HTML, CSS

Built with React, the Travel Dreams Dashboard concept allows users to enter the name of a city that they wish to travel to, and via multiple API requests, receive information such as the current weather, the price of a flight from a chosen departure city, and a populated image carousel to inspire a future getaway. Also, stay tuned for future added features!

SpaceX Landing Page Clone

[Preview](#) [Github](#)

Tech: JavaScript, HTML, CSS

Created with HTML, CSS, and Vanilla JavaScript, the goal of this project was to create a SpaceX landing page clone as true to the actual website as possible. My clone is fully responsive, and includes links to the corporate site, offering a complete and seamless user experience.
